

TridentCareSM AT HOME

We're Here For You!

Coronavirus (COVID-19) Service Update

TridentCare At Home is here to provide portable **X-Ray** and **Ultrasound** services to patients *wherever they call home*

- TridentCare Associates are following all CDC guidance in connection with the performance of our services*
- Please visit www.tridentcare.com/home-care-services/ for more information about our At Home services.
- For more information on how we are protecting our employees and the patients we serve, please visit www.tridentcare.com/covid/.

TridentCare is proud to offer a solution to patients, families and caregivers challenged with transportation needs and concerns during the COVID-19 pandemic. Our portable services, which are available seven days per week**, reduces the stress of transportation, crowded spaces and prolonged wait times and, most importantly, reduces the risk of exposure to COVID-19 associated with having these services performed in hospitals and urgent care settings.

Our professionally trained, fully screened and vetted technologists have been trained on, and are in compliance with, current COVID-19 related CDC guidance and infection prevention standards.

***NOTE:** Please ensure patients with any respiratory symptom are equipped with appropriate PPE. Without it, TridentCare may not be able to provide services.

****Service availability may vary by geographic location and status of Covid-19 epidemic.**
